

Web Security Problem Solved

Comodo Dome Secure Web Platform

Only Comodo Dome delivers complete web and email protection against emerging threats by providing a modular Cloud Delivered Secure Web Platform. Simply choose the modules you require today, and seamlessly add new ones in the future.

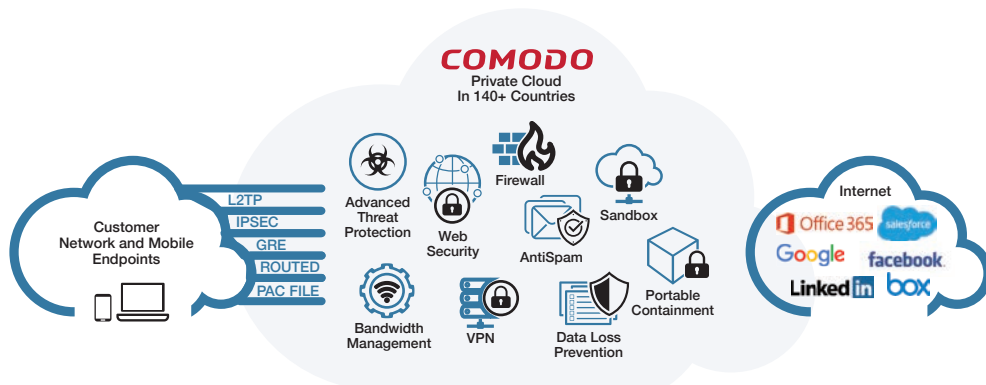

Complete Web Security

Comodo Dome is a revolutionary Cloud Delivered Secure Web Platform delivered as a Security as a Service (SaaS) cloud infrastructure, that incorporates unknown file containment, Advanced Threat Protection, [Web Security](#), Sandboxing, Antispam, DLP, Next Generation Fire-wall, Bandwidth management, and a secure VPN service. Each individual module can be added in minutes to provide total security and compliance to corporate policies, regardless of the end user, device or location. All inbound and outbound traffic is scanned in real time ensuring protection from even the latest web and email threats.

Comodo's portable containment technology provides unparalleled security across all web and email threat vectors to ensure end users can freely open, execute and use files without the risk of infection. Comodo's containment technology is lightweight, application-agnostic and has no CPU dependencies.

Take your internet security to the next level with our world class 100% cloud solution that provides unprecedented protection and performance.

COMODO

Comodo Dome

Adding Comodo between your existing infrastructure and the internet couldn't be easier — simply make Dome your next hop to the internet. There are no appliances or headaches and in minutes you have gained a bulletproof layer of security that can fill in the significant security hole left by traditional disparate and mismatched security solutions.

Security Features		
Valkyrie: cloud-based sandbox and file verdict platform	Real-time Synchronization with Comodo Threat Research Labs (CTRL) Intelligence	Botnet Protection
Automated unknown File Containment	Static, dynamic and human file analysis	Unique knowledge of known good and known bad software publishers and applications for auto-whitelisting
Utilizing Comodo's patent-pending portable containment technology	Antispam	
Built in VPN service	Next Generation Firewall	
	Data Loss Prevention	
Traffic Forwarding Methods		
L2TP / IPSEC VPN tunnels	ICAP	Explicit proxy
GRE tunnels	Proxy chaining	PAC files
Policy based routing	Comodo CDM agent	
Advanced Policy Controls		
URL filtering by category	File type blocking	QOS and bandwidth management
15+ million domains	User/Group based policies	File-type blocking
Custom categories	Endpoint Sandbox Controls	
Location based configuration	Domain blacklisting and whitelisting	
System Features		
No hardware to install	Detailed user and group reports	Forensic-grade auditing of all management events
LDAP/LDAPS, Kerberos, NTLM integration	Bandwidth reports	Customizable branding / appearance
HTTP and HTTPS support	Trends over time	Scheduled reporting and alerting
Archive decompression	Malware incident analysis	Comprehensive in-depth analytics engine
In-depth malware analysis reports	Modern web-based management interface	
	Customizable dashboards	

Security Beyond Boundaries

To [prevent malware intrusions](#) and data loss it is critical to enforce access policies on internal devices, and also [remote](#) and mobile devices that are used off-network. Comodo Dome includes industry leading protection across all of your users and devices whether they are on the network, or on a public Wi-Fi hotspot.

About Comodo

The Comodo organization is a global innovator and developer of cybersecurity solutions, founded on the belief that every single digital transaction deserves and requires a unique layer of trust and security. Building on its deep history in SSL certificates, antivirus and [endpoint security](#) leadership, and true containment technology, individuals and enterprises rely on Comodo's proven solutions to authenticate, validate and secure their most critical information. With data protection covering endpoint, network and mobile security, plus identity and access management, Comodo's proprietary technologies help solve the malware and cyber-attack challenges of today. Securing online transactions for thousands of businesses, and with more than 85 million desktop security software installations, Comodo is Creating Trust Online®. With United States headquarters in Clifton, New Jersey, the Comodo organization has offices in China, India, the Philippines, Romania, Turkey, Ukraine and the United Kingdom.
